No spinning	 Is the spin timer knob at the "O" position?	 Is the lid closed?	 Is the laundry unevenly balanced?
No drain	 Is the drain hose kept down?	 Whether the drain hose is twisted? Or whether the threshold is too high?	 Whether drain hose is frozen?
Weak washing performance	<ul style="list-style-type: none"> ■ Are the clothes too much? ■ Is the V belt too loose? ■ Is the voltage too low? 		

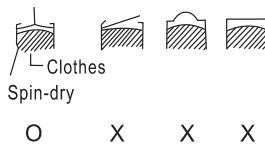

Notes for spinning

Distribute clothing evenly in tub

Putting the spinner cap in place

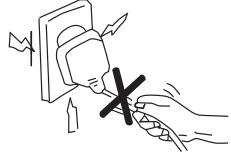

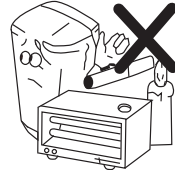

Spinner cap

Do not put hands into the rotating tub

GUIDANCES FOR SAFETY AND DURABILITY

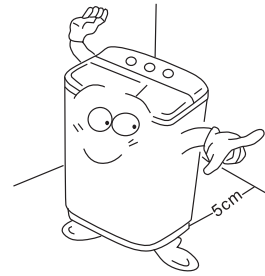

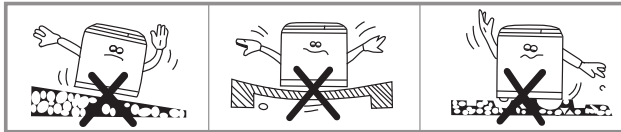

<p>Do not expose the washing machine to a direct sun light or rain.</p> 	<p>Do not install the washing machine around a damp place.</p> 	<p>Do not sprinkle water over switches.</p> 
<p>Let water drain away from the drain hose thoroughly.</p> 	<p>When plugging out the power cord, do not hold the wire.</p> 	<p>Keep children away from the washing machine.</p> 
<p>Keep the washing machine away from fire or heat source.</p> 	<p>Do not wipe the washer with volatile material, gasoline, etc.</p> 	<p>Do not pour over 50°C water into the tub.</p> 

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.

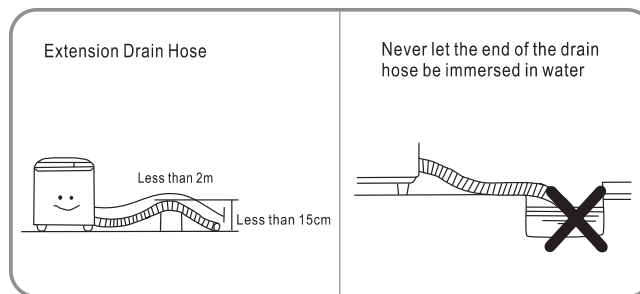

NOTE REGARDING INSTALLATION

Locate at a stable level surface

- Locate washing machine at a stable ,level surface ,(allow maximum oblique angle to 2°)
- Keep the washing machine more than 5cm from the wall to prevent a noisy sound while spinning.
- A carpet must not obstruct the ventilation openings.

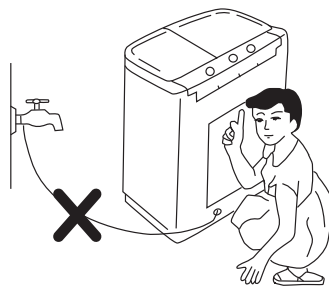

Connect the drain hose

Connecting power and grounding

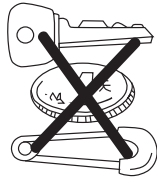

- Washer earth wire is connected to the power plug. Don't alter it .
- The power socket must have earth wire securely installed.
- The appliance must be positioned where the plug is accessible.

CAUTION

- Never connect the earth wire to a gas pipe ,a water tap pipe ,a phonewire or lighting rod .
- Do not use it in case, the power cord or plug have been damaged. So as to avoid electric shock and fire risk.
- If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or a qualified person in order to avoid a hazard.

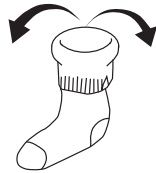

PREPARATION BEFORE WASH

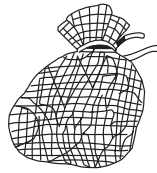

- Be sure to remove things such as keys, pins and coins from the laundry.

- Wash oily or dyed laundry separately.

- Wash fuzzy laundry by its inner side.

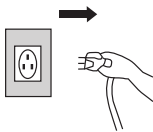

- Wash delicate clothes, wrapping them in a nylon net.

- Insert the power plug completely.
- Take down the drain hose.
- Connect the inlet hose.

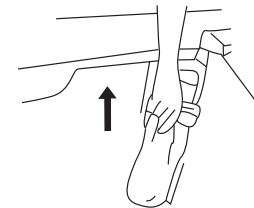

Maintenance

- Remove the power plug after washing.

- Wipe the washer with a piece of clean and dry soft cloth.

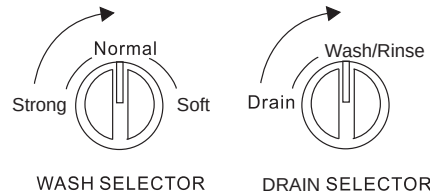

- Must clean tubs after bleaching or starching, otherwise, some deposit will be created.

If the washing machine has a drain pump please pay attention to the following details.

1. The operation of the washing machine with drain pump is the same as the one without drain pump.
2. When the wash selector is turned to “Drain” position, the pump begins to work. It helps with draining away water.
3. When the spin timer is turned, the spin tub begins rotating ,the pump begins working at the same time.
4. Pay attention that you should not hang the hook of drain hose higher than 1 meter from the ground .If the height is more than 1 meter, the pump may not work normally.
5. For some reasons,sometimes you will find that the pump is working but there is no water drained away. This is not a malfunction,please move the drain hose down, when there is water drained away ,hang the hook of drain hose at the height that you want .
